

Actionable Information Driven by Superior Analytics and Reporting

Successfully operating in today's complex healthcare environment relies on accessing financial, quality and clinical data critical to increasing productivity and quality of care.

A proven analytics tool, Precision.BI helps organizations overcome the inefficiencies created by siloed technology platforms and databases that litter the healthcare IT landscape. You can view your entire revenue cycle and clinical operations with the power and flexibility of Precision.BI. The most widely deployed healthcare-specific analytics solution in the industry, this unique tool helps you:

- build informed business strategies
- improve financial and clinical performance
- comply with payor and regulatory requirements
- report against critical quality measures

Our analytics platform goes beyond traditional dashboard or reporting tools, allowing easy analysis and reporting on key metrics from many data sources to optimize understanding and performance across your organization.

Precision.BI, a division of Meridian Medical Management, is designed for the non-technical business user. Our extensive ad hoc searching and analysis capabilities empower you to take a "dive deep" into your data to determine the root causes of issues and build strategies to monitor trends and activities across your organization using the built-in dashboard design and publishing tools.

With Precision.BI, business leaders are able to quickly see and drill into their performance data, and make adjustments or take corrective action within everyday operations.

Backed by Precision.BI's team of data modelers, designers and project managers, you will never be left alone to navigate your data challenges.

Exceptional Data Integration

Precision.BI utilizes secure, nightly incremental extracts of your mission critical data to build a data warehouse optimized for your organization's unique needs. Using this one application, you can coordinate medical billing data with other financial, clinical and productivity data for a single, integrated view of your organization. Our solutions team's leading-edge integrated analysis, reporting and visualization tools allow you to present many different macro, aggregate and detailed views of your organization.

Our clients utilize Precision.BI to measure performance toward meaningful use and medical home requirements. Our solutions team has experience with over 65 NQF, meaningful use, HEDIS and patient centered medical home measures in the following areas:

- Alcohol & drug
- Asthma
- Cancer & cancer screening
- Clinical summaries
- Coronary artery disease
- CPOE
- Demographics
- Depression
- Diabetes
- Electronic health information
- eRx
- Glaucoma
- Heart failure
- High blood pressure
- Hypertension
- Immunizations
- Ischemic vascular disease
- Low back pain
- Meds
- Pharyngitis
- Tobacco use & cessation
- STD screening
- Up-to-date lists
- Vitals
- Weight management

We know the challenges you face with monitoring outcomes performance across your continuum of care. We can help you bring together all of your outcomes-related data, from multiple EHR sources, to form a full, accurate, aggregate picture of your outcomes performance.

Custom dashboards organize metrics in a meaningful way for your business. Key metrics have benchmarks and targets to track your strategic goals. Progress can be automatically updated on a daily basis.

In addition to reporting on quality metrics, Precision.BI's broad array of reporting capabilities can be extended across your entire enterprise, from myriad departments to personal KPIs. This multifaceted solution works in tandem with existing software and information systems, rapidly integrating data from multiple healthcare and non-healthcare information technology platforms, including:

- Allscripts
- Epic
- GE Healthcare
- Meditech
- NextGen
- Cerner VitalWorks
- Siemens
- McKesson
- CPSI
- Athena
- Oracle PeopleSoft
- Kronos
- Intuit QuickBooks
- Trizetto
- Lawson
- onBase
- Microsoft Dynamics
- Sage ERP MAS
- Quadramed

Precision.BI allows you to:

Monitor vital business metrics

Make decisions that impact your organization using detailed dashboards and key performance indicators with drill down and drill through data mining capabilities to review fine details.

Automate a variety of core business functions

Increase organizational efficiency and productivity by automating standard reporting, such as accounts receivable management, payor auditing, provider productivity and clinical quality measurement.

Ensure prompt payment

Generate outstanding accounts receivable reports by age (greater than 90 days, greater than 180 days, etc.) or by insurance carrier. You can quickly view which invoices are outstanding to ensure prompt follow up and collection. Precision.BI also provides in-depth CPT code analysis to ensure maximum reimbursement.

Improve patient care

Check demographic information or the latest clinical results and generate mailing or patient call lists. Identify active patients per provider, chronic condition or particular medication.

Build personalized dashboards

Receive daily, weekly or monthly measurements, scorecard and performance alerts based on the specific needs of your organization. These dynamic reports are flexible and can be customized to meet your unique business needs.

Customize, automate and share the delivery of reports

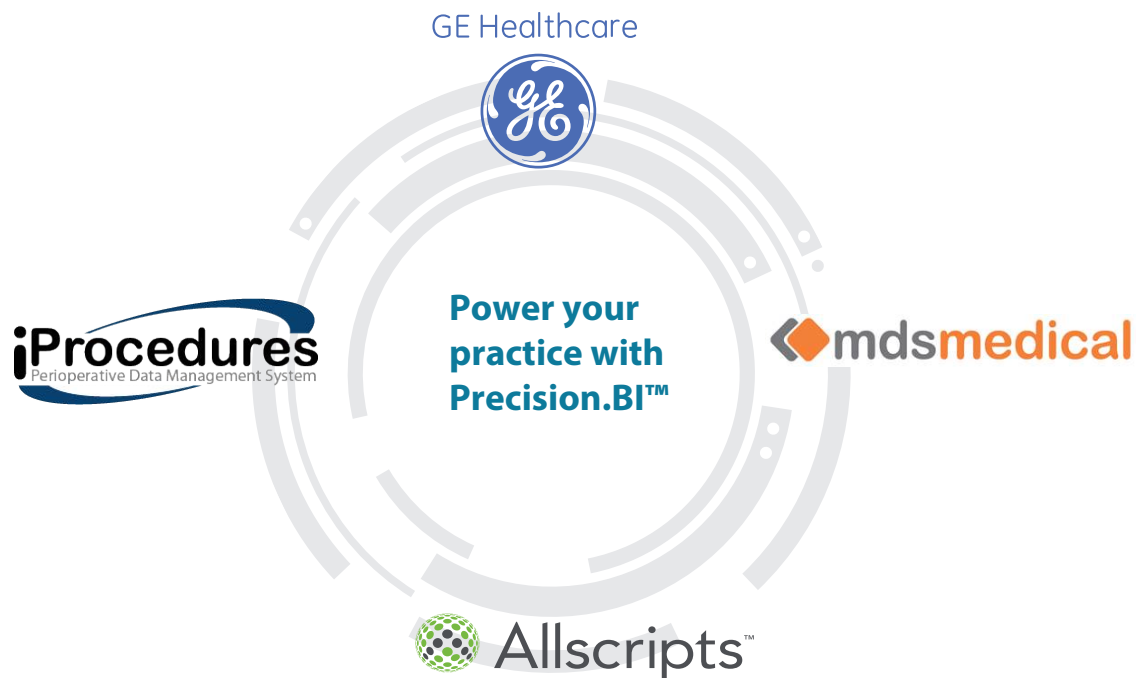

Automate delivery of essential information and reports to personnel both inside and outside your organization. With enhanced information flow, performance will improve in measurable ways. Push key information out to the users you specify, on any schedule.

Measure your practice's performance

Monitor changes to identify areas that are improving or in need of improvement. A built-in, customizable alert mechanism indicates when and where data is not performing up to your standards. You can analyze data for PQRI, pay for performance, meaningful use and patient centered medical home.

These are just a few examples of the benefits you will experience with Precision.BI. Contact us today to learn how Precision.BI can help your practice work smarter.

A number of healthcare leaders have chosen to partner with Meridian to meet their analytics needs, including: Allscripts, GE Healthcare and others. Precision.BI has helped many of the leading hospitals, health systems and provider practices in the country find effective solutions to their business challenges. With an intuitive interface, short training cycle and easy setup, Precision.BI deploys quickly and is scalable and adaptable to any number of users and for any size data set.

Precision.BI is a division of Meridian Medical Management. With adaptable RCM solutions backed by leading-edge analytics, Meridian partners with healthcare providers to empower them with actionable business insights from data they can see, trust, access, and interact with independently. Ultimately this benefits the provider by uncovering hidden business opportunities and optimizing their long-term performance.
